

Lab week 4

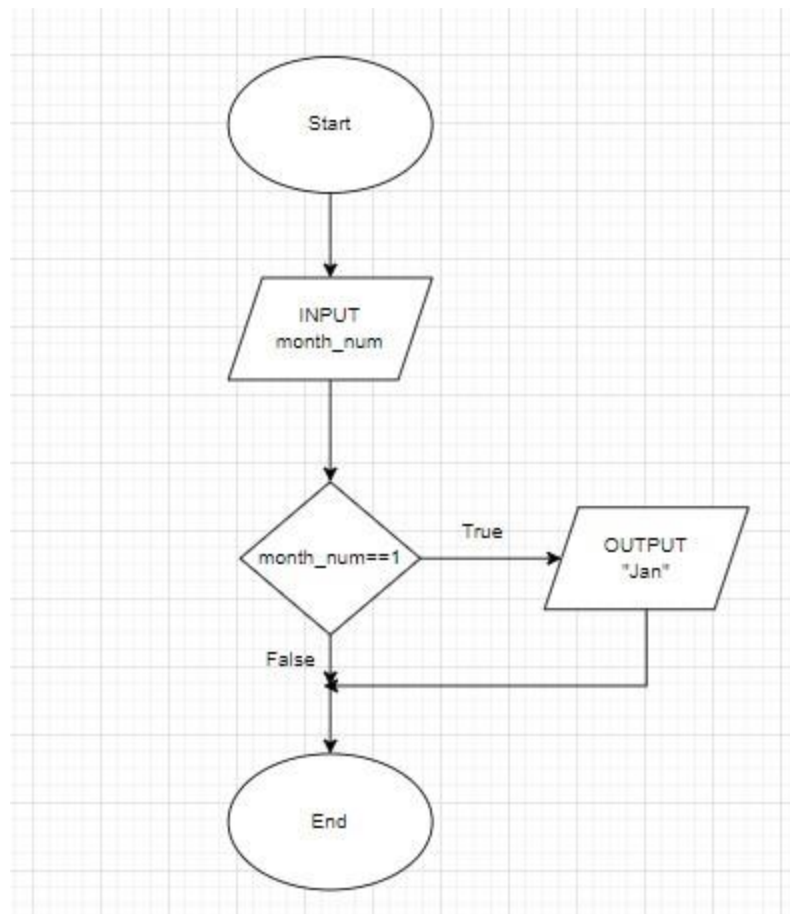

1. Write a pseudocode, flowchart and a computer program that reads a month number and print "Jan" if the month is 1."

(refer to page 23 in "50 programming Challenges....")

Pseudocode

1. Input an integer (month_num)
2. if month_num is 1 then print "Jan"

Flowchart

C++ program

```
#include <iostream>

using namespace std;

int main()
{
    int month_num;

    cout<<"Please enter a month number: ";
    cin>>month_num;

    if(month_num == 1)
    {
        cout<<"\nJan";
    }

    return 0;
}
```
