

2. Write a pseudocode, flowchart and a computer program

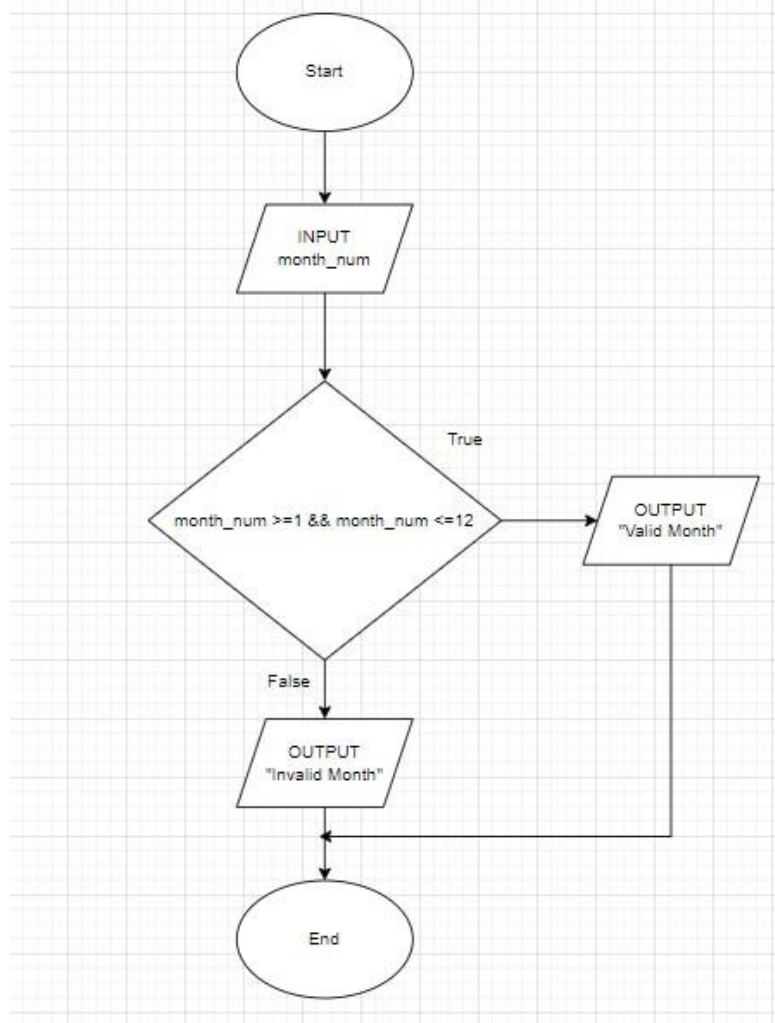

that reads a month number and print "Valid Month" if the month is in range of 1 to 12, otherwise print "Invalid Month".

(refer to page 25 in "50 programming Challenges....")

Pseudocode

1. Input an integer (month_num)
 2. if month_num is more than or equal to 1 and less than or equal to 12 then print "Valid Month"
- else print "Invalid Month"

Flowchart

C++ program

```
#include <iostream>

using namespace std;

int main()
{
    int month_num;

    cout<<"Please enter a month number: ";
    cin>>month_num;

    if(month_num >= 1 && month_num <=12)
    {
        cout<<"\nValid Month";
    }
    else
    {
        cout<<"\nInvalid Month";
    }

    return 0;
}
```
