

LAB WEEK 7

1. The following flowchart outlines the process of inputting five integers and printing the counts of odd and even integers. Write a C++ program based on this flowchart.

Answer:

```
#include <iostream>
using namespace std;

int main()
{
    int N, bilGenap=0, bilGanjil=0;

    cout<<"Sila masukkan 5 nombor: ";
    cin>>N;

    if (N%2==0)
    {
        bilGenap=bilGenap+1;
    }
    else if (N%2!=0)
    {
        bilGanjil=bilGanjil+1;
    }

    cin>>N;

    if (N%2==0)
    {
        bilGenap=bilGenap+1;
    }
    else if (N%2!=0)
    {
        bilGanjil=bilGanjil+1;
    }

    cin>>N;

    if (N%2==0)
    {
        bilGenap=bilGenap+1;
    }
    else if (N%2!=0)
    {
        bilGanjil=bilGanjil+1;
    }

    cin>>N;

    if (N%2==0)
```

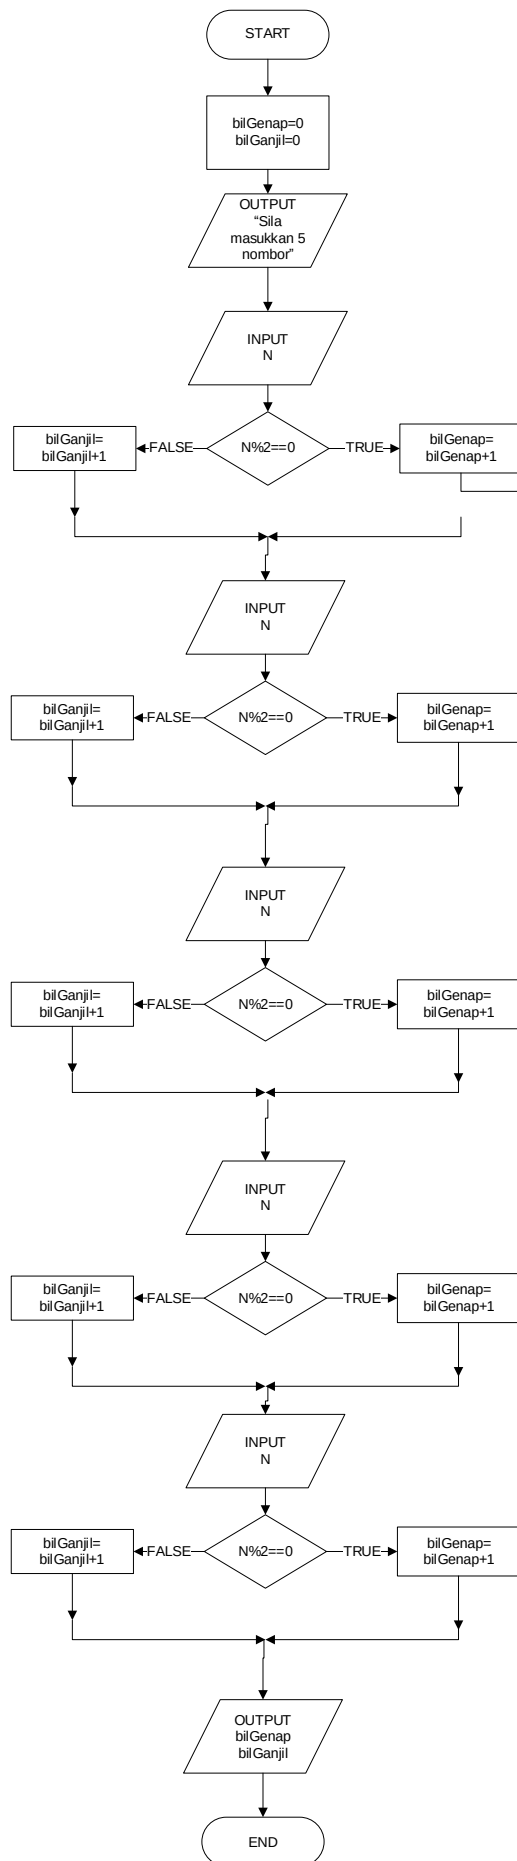

```
{
    bilGenap=bilGenap+1;
}
else if (N%2!=0)
{
    bilGanjil=bilGanjil+1;
}

cin>>N;

if (N%2==0)
{
    bilGenap=bilGenap+1;
}
else if (N%2!=0)
{
    bilGanjil=bilGanjil+1;
}

cout<<"\nBilangan Nombor Genap: "<<bilGenap;
cout<<"\nBilangan Nombor Ganjil: "<<bilGanjil;

return 0;
}
```
