

2. Write a C++ program that utilizes loops to input five integers and display the counts of both odd and even integers.

Answer:

```
#include <iostream>
using namespace std;

int main()
{
    int N, C, bilGenap=0, bilGanjil=0;

    cout<<"Sila masukkan 5 nombor: ";
    for (C=0;C<5;C++)
    {
        cin>>N;

        if (N%2==0)
        {
            bilGenap=bilGenap+1;
        }
        else if (N%2!=0)
        {
            bilGanjil=bilGanjil+1;
        }
    }

    cout<<"\nBilangan Nombor Genap: "<<bilGenap;
    cout<<"\nBilangan Nombor Ganjil: "<<bilGanjil;

    return 0;
}
```
