

3. Design a C++ program to create a pattern of asterisks as follows.

			*
		*	*
	*	*	*
*	*	*	*

C++ program

```
#include <iostream>
```

```
using namespace std;
```

```
int main()
```

```
{
```

```
    // Nested loops to print the pattern
```

```
    for (int i = 1; i <= 4; i++)
```

```
    {
```

```
        // Print leading spaces for alignment
```

```
        for (int j = 1; j <= 4 - i; j++)
```

```
        {
```

```
            cout << "  ";
```

```
        }
```

```
        // Print asterisks with spaces in between
```

```
        for (int j = 1; j <= i; j++)
```

```
        {
```

```
            cout << " *";
```

```
        }
```

```
        cout << endl; // Move to the next line
    }

    return 0;
}
```
